

Airlink

Item number: 530.41.1252.2

EAN: 5703347533266

Thermex's Airlink range hood seamlessly integrates into your kitchen. White-lacquered steel, two filters, and LED lights. Easy cleaning and simple installation. Soft-touch panel with light control and timer function. Optimized damper opening for low pressure drop and built-in switch for the ventilation system. Beautiful design, user-friendly, and efficient.

The Airlink range hood from Thermex is an under-cabinet central ventilation hood measuring 60 cm in width. It is designed to seamlessly blend into your kitchen environment, providing efficient air extraction. With its stylish appearance in white-lacquered steel and rounded edges, it adds a modern and elegant touch to the kitchen. This hood is equipped with two grease filters and two LED lamps for optimal functionality.

Cleaning the Airlink range hood is a simple task, with the surface easily wiped clean with a damp cloth to remove dust and dirt. Additionally, the two grease filters are removable and dishwasher-safe, making cleaning even more convenient.

Installation of the Airlink range hood is straightforward and convenient. Using the included brackets, it can be easily mounted between two cabinets or in a 60 cm cabinet, allowing customization based on the kitchen layout and preferences.

The Airlink range hood from Thermex offers user-friendly operation with a white soft-touch panel. This intuitive control allows you to turn the hood on and off, control the light intensity with a dimming function, and includes a practical timer function with options for 20, 40, or 60 minutes. These features provide full control over the hood's performance, making it easy to customize according to your needs. Additional options include the Top Link, which automatically activates the hood via the oven or cooktop, as well as the possibility to purchase a remote control, Sensemex (indoor climate sensor), and Hood Light Link.

The Airlink damper opening is maximized to ensure the lowest possible pressure drop. This means less demand on the ventilation system compared to previous models. The larger the opening, the less pressure is required from the ventilation system over the damper. Moreover, it is possible to completely close the damper. The Airlink damper is powered by an electric motor, ensuring an immediate response
