

Central 787 600 mm Stainless

Item number: 530.41.9068.2

€ 1.161,29

EAN: 5703347528866

Thermex Central 787 600 in stainless is the market's most efficient decorative extractor hood for communal chimneys. The hood's large filter surface provides maximum absorption with a minimum of air flow.

If you do not want a cupboard above the hob, then the **Central 787** will be a good choice when you have to choose an extractor hood and live in an apartment with a communal exhaust. Beautiful, efficient and energy-saving. The hood is available in two different sizes (60 and 90 cm in width), and is made of stainless steel. Light and damper can be controlled with two buttons on the front of the hood. Central 787 has a built-in switch so that it can cooperate with the ventilation system in the building. Tested and recognized by the authorities for communal flues.
