THERMEX TXHPS12000 – Heat Pump / Air Conditioner / Dehumidifier - WiFi heat pump covers up to 50 m²

THERMEX TXHPS12000 – Heat Pump / Air Conditioner / Dehumidifier - WiFi heat pump covers up to 50 m².

Heating and ventilation in the home are necessary to avoid mold, fungus, decay, and to reduce the amount of radon gas.

The THERMEX TXHPS12000 WiFi heat pump provides both energy-saving heating and ventilation – the result is a healthy indoor climate for the residents of the house.

Partly in the form of providing heat to the house in an energy-saving way compared to a traditional electrical solution, and also by creating air circulation in the room.

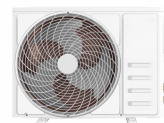

Heating

The THERMEX TXHPS12000 WiFi Heat Pump draws in air and heats it to the desired temperature level.

Cooling

On hot days, the THERMEX TXHPS12000 WiFi heat pump can be set to cool the room, ensuring a comfortable temperature.

Dehumidification

The THERMEX TXHPS12000 WiFi Heat Pump can take care of removing condensation and moisture from the room.

Overall, a simple and practical solution

The features of the THERMEX TXHPS12000 WiFi heat pump cover everyone's needs.

The THERMEX TXHPS12000 WiFi heat pump is suitable for all rooms in the house or commercial building. The room temperature can be set for heating 17~32 °C / cooling 0~30 °C. The heat pump can be installed to ensure a good and healthy indoor climate.
