

Easy Compact heat pump

Item number: 605.09.3000.2

€ 4.690,53

EAN: 5703347604829

Better indoor climate ensures that the house can breathe - all-in-one without unsightly outdoor compressors

Heating and ventilation in the home is necessary to avoid mold, fungus, rot and to reduce the amount of radon gas. **The Thermex Easy Compact heat pump** contributes with both energy-saving heat and ventilation – the result is a healthy indoor climate for the house's residents. Partly in the form of adding heat to the house in an energy-saving way compared to a traditional electricity solution, partly by creating air circulation in the room. **The Thermex Easy Compact heat pump** appears in an elegant and timeless design that can be included in many different homes or business premises.

In the heat pump, the compressor and evaporator part are combined in the indoor part. The heat pump's cabinet is made of quality materials with an LED display. Good for the indoor climate in all rooms The Thermex Easy Compact heat pump is suitable for all rooms in the house or commercial premises. The room temperature can be set to 18-30 °C. The heat pump can be installed to ensure a good and healthy indoor climate and with a significant saving of up to 2/3 on the electricity bill. **NB: Should not be used as a primary heat source.**
