

Humidex 1 - Humidifier white

Item number: 730.21.3001.2

€ 144,15

EAN: 5703347702549

Avoid drying out mucous membranes and skin. - Avoid static electricity - avoid material damage due to drying out

The ideal humidity for humans is in the range of 40-60% relative humidity. Especially in winter - and newer tight houses with a ventilation system - the humidity can fall below this level, which can cause the air to dry out, as well as static electricity and damage to furniture and other fixtures. Easy to place in the home or at the workplace. Filling water in water container at the top. UV purification of water in container. Act as an air purifier. Steam-free humidification. With Hepa filter
