Multifunction fan with adaptive hygostat that ensures a healthy indoor climate

Multifunctional fan with adaptive hygostat ensures a healthy indoor climate. Adaptive hygostat. **THERMEX Silent One** is equipped with a unique system that adapts to the humidity in the surroundings both inside and outside.

The fan is activated when the humidity fluctuates, this takes place in two stages. For minor fluctuations, the suction power is increased to 65 m³/h and for large and sudden fluctuations, the suction power is increased to 90 m³/h. When the humidity is back to its original level, the suction power changes to 25 m³/h, which is the normal level.

Basic ventilation + boost; Silent One runs around the clock on basic ventilation and sucks 25 m³/h. When activating the adaptive hygostat or presence sensor, the suction power increases.

24/7 function can be canceled if desired (see instructions). Front and edge suction. THERMEX Silent One is aerodynamic - suction both in the front and on the sides, which provides an effective and uniform suction in the room.

Motion sensor. THERMEX Silent One has a motion sensor - switches on and off automatically. Runs 24 hours a day at the minimum level, 25 m³/h when moving, the air volume increases to 65 m³/h.

Specifications

Energy consumption [W]	8
Luftmængde ved 0 Pascal [m ³ /t]	90
Kapslingsklasse	IP45
Minimum sound pressure at 3 meters [dB(A)]	17
Control	None
Material	Plastic
