

Future 100 - Without steering

Item number: 200.34.2500.2

€ 104,84

EAN: 8413893148902

Thermex Future is a fan that places great emphasis on appearance without compromising on function

When developing the **Future** fan series, great emphasis was placed on appearance without compromising on function. In relation to the capacity, the series is a very quiet and discreet ventilation solution.

The timer controls the desired time from when the light is switched off until the fan stops. The hygostat control starts the fan when the relative humidity exceeds the desired level and switches off the fan when the humidity is brought down below the selected level.

For the model with both timer and hygostat control, the hygostat control is the primary control. The fan will therefore start regardless of whether the light is on or not, as long as there is power to the fan.

Specifications

Energy consumption [W]	13
Luftmængde ved 0 Pascal [m3/t]	95
Kapslingsklasse	IPX4
Control	None
Material	Plastic
