A++

Thermex airgrip in white with motor is undoubtedly the market's most efficient hood with motor. The hood's aerodynamic design provides maximum absorption with a minimum of air flow and electricity consumption.

Thermex Airgrip is both innovative and super efficient. In an apartment where there is a common exhaust, it is one of the most efficient kitchen hoods on the market. The unique design of the collection part means that steam and fumes are collected much better, and makes it easier for the communal system to transport the air out of the apartment. The built-in humidity meter means that Airgrip can be controlled as needed. In an apartment with a common exhaust, the kitchen hood also contributes to ventilation when you are not cooking. Tested and recognized by the authorities for communal flues.
