Thermex Green Air in white is a lamp model of the highest quality. The built-in Plasmex Filter provides an effective purification of the air in your kitchen, and the installation could not be easier

Thermex Green Air in white is a modern lamp model that fits into any kitchen. The design means that the hood could be mistaken for a ceiling lamp. Thermex Green Air is also installed just as easily as a regular ceiling light. Due to the built-in Plasmex Filter, the hood does not need any piping. If you do not have the option to install a regular exhaust, this is a very easy solution. The hood simply hangs from wires that are mounted in the ceiling.

The hood has a built-in Plasmex Filter which cleans the air extremely efficiently. 96.5% of the air is cleaned when it is sent through the filter. It is much higher than a traditional carbon filter where the air typically has to pass through 3-4 times before the air is cleaned. In the Thermex Green Air model, the air is cleaned of odors and bacteria for the first time. Plasmex filters are also used in air purifiers, so the hood can also be used as an effective air purifier. In addition, there is also a built-in UV lamp in the hood, which effectively kills unwanted bacteria. And with a lifetime of 10 years, on the Plasmex filter, you don't have to worry about changing the carbon filter in the hood like in other lamp models.

Operation

Thermex Green Air comes with a remote control, as well as a glass touch on the glass plate at the bottom of the hood. The remote control can be used to easily and simply switch the hood's light on and off. The light can be switched on in 2 strengths, 50% and 100% light. In addition, you can adjust the suction power in 3 steps.

Engine

The built-in motor in the Green Air model sends a whopping 456 m³/h through the Plasmex Filter and back into the kitchen. It provides extremely thorough ventilation in your kitchen, and odors and grease are collected in the grease filter and Plasmex filter respectively.

Specifications

Minimum airflow [m³/h] **340**

Minimum-Soundpower [dB(A)] **58**
